YOUR CEILING SOLUTION

ARCHITECTURAL ILLUMINATED CEILING SYSTEM

Seamless, Modern, Engineered for Premium Interior Projects

What is Cellux Ceiling

Cellux Ceiling is a premium stretch ceiling system engineered for modern architectural environments. It delivers seamless illuminated surfaces with superior light diffusion and clean aesthetic integration.

With flexible membrane technology, Cellux enables architects and designers to create flat, curved, and custom ceiling forms while maintaining durability and visual precision.

Why Choose Cellux Ceiling

- Seamless ceiling spans up to 5 meters
- Superior uniform light diffusion
- Lightweight and efficient system
- Flexible for custom architectural design
- Printable for custom visuals and branding
- Waterproof and long-lasting durability
- Lower maintenance than traditional ceiling systems
